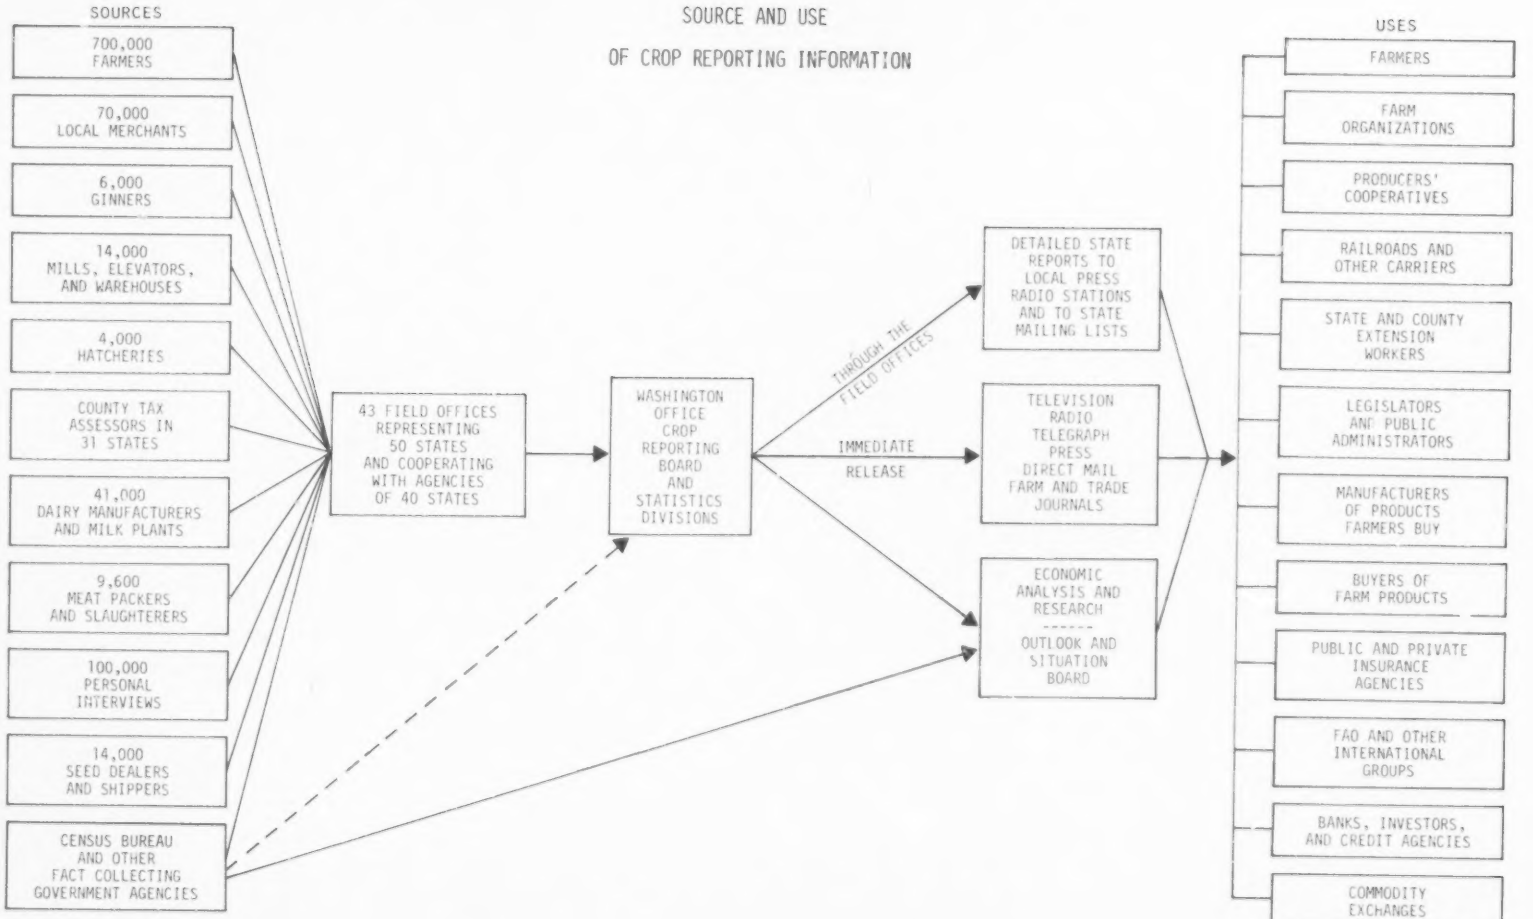
SOURCE AND USE OF CROP REPORTING INFORMATION



This chart shows how information flows through the U.S. Department of Agriculture's Statistical Reporting Service from the sources to the people who use it. The government's official agricultural estimates are based on reports from a cross-section of farmers and people who do business with farmers. They are checked against the complete enumerations made every five years by the Bureau of the Census and against the reports of buyers, processors and carriers of farm products whose operations are a measure of farm production. Besides their immediate usefulness to farmers and the general public, these estimates provide basic data required for analysis of farm income, prices, costs, parity price determinations, and prospective demand and prices for farm products.

Nebraska Agricultural Statistics

ANNUAL REPORT 1981-1982

PREFACE

Information in this statistical summary of Nebraska agriculture is the result of thousands of voluntary reports from farmers, ranchers and agribusiness firms. Much of the detail needed for county estimates was collected from farmers and ranchers by mail with the Annual Agricultural Survey and acreage and livestock surveys. County extension staff, local lending institutions and the National Weather Service have also contributed through weekly reports on weather and crops. The excellent cooperation from all the above mentioned and other State, University and USDA agencies is very much appreciated.

The Nebraska Department of Agriculture and the United States Department of Agriculture cooperate in collecting and compiling these agricultural statistics. Under this cooperative agreement, the Nebraska Crop and Livestock Reporting Service publishes over 100 statistical reports annually covering most Nebraska agricultural commodities.

Livestock and number of farms estimates were prepared by Dennis Johnson. Crop estimates were prepared by Rudy Wagner, Scott Keller, and Bob Little. Dan Capstick was responsible for poultry, prices and farm labor estimates. Rick Geesey and Mark Aitken were responsible for much of the data collection activity including summarization of the Annual Agricultural Survey. Computer programmers and system design staff of Stan Schmidt, David Mueller and Mike Hanus played an important role in processing regular monthly reports and other State Department of Agriculture activities. Bill Dobbs supervised the technical staff, reviewed estimates and book contents.

The organization and tabular material were prepared by Mrs. Charlotte Rowe, who also coordinated the typing, assembling, proofreading and checking of this book. Many other hours of tedious checking and proofing were accomplished by the clerical staff.

To request current reports issued during the year or copies of this report write Robert Raun, Director, Nebraska Department of Agriculture, 4th Floor 301 Centennial Mall South, P.O. Box 94947, Lincoln, Nebraska 68509, or Jack Aschwege, State Statistician, P.O. Box 81069, Lincoln, Nebraska 68501.

NEBRASKA—RANK IN AGRICULTURE

RANK:

1st	Fed cattle and calves marketed, 1982. Number--4,500,000.
1st	Commercial cattle slaughter (live weight), 1982. Thousand lbs.--6,135,920.
1st	Alfalfa meal production, 1982. Tons--519,200.
1st	Great Northern beans production, 1982. Cwt.--2,332,000.
2nd	All cattle and calves, January 1, 1983. Number--7,200,000.
2nd	Cattle on feed, January 1, 1983. Number--1,880,000.
2nd	Commercial cattle slaughter, 1982. Number--5,658,800.
2nd	Sorghum silage production, 1982. Tons--805,000.
2nd	Commercial livestock slaughter, all species, 1982. Thousand lbs.--7,133,369.
2nd	Commercial red meat production, 1982. Thousand lbs.--4,359,847.
2nd	Cash receipts from cattle and calves, 1982. $3,271,504,000
3rd	Value of all cattle and calves on farms, January 1, 1983 -- $2,736,000,000.
3rd	Sorghum grain production, 1982. Bushels--121,910,000.
3rd	Dry edible beans production, 1982. Cwt.--3,180,000.
4th	Beef cows and heifers that have calved, January 1, 1983. Number--2,029,000.
4th	Corn for grain production, 1982. Bushels--770,340,000.
4th	Pinto beans production, 1982. Cwt.--666,000.
4th	Land in farms and ranches, 1982. Acres--47,600,000.
4th	Red kidney bean production, 1982. Cwt.--182,000.
5th	Capacity of commercial grain storage facilities, January 1, 1983. Bushels--666,143,000.
5th	All hay production, 1982. Tons--7,810,000.
5th	Calves born, 1982. Number 1,930,000.
5th	All hogs and pigs, December 1, 1982. Number--3,500,000.
5th	Pigs saved, 1982. Number--5,618,000.
5th	Cash receipts from hogs and pigs, 1982. $729,679,000.
5th	Rye production, 1982. Bushels--1,107,000.
5th	Winter wheat production, 1982. Bushels--101,500,000.
5th	Commercial hog slaughter, 1982. Number--4,334,900.
5th	Cash receipts from all livestock marketings, 1981. $3,520,799,000
6th	Corn silage production, 1982. Tons--5,800,000.
6th	Alfalfa hay production, 1982. Tons--5,445,000.
6th	Value of principal crops produced, 1982. $3,377,697,000.
6th	Sugar beets production, 1982. Tons--924,000.
6th	Value of farm real estate, 1982. $29,860,000,000.
6th	All other hay (includes wild) production, 1982. Tons--2,365,000.
6th	Cash receipts from farm marketings, 1981. $6,376,028,000.
7th	Sheep and lambs on feed, January 1, 1983. Number--85,000.
7th	Harvested acreage, principal crops, 1982. Acres--18,917,000.
7th	Oats production, 1982. Bushels--24,650,000.
7th	Cash receipts from crops, 1981. $2,855,229,000.
8th	All wheat production, 1982. Bushels--101,500,000.
9th	Soybean production, 1982. Bushels--82,800,000.
12th	Cash receipts from sheep and lambs, 1982. $10,663,000.
16th	All sheep and lambs, January 1, 1983. Number--205,000.
16th	Wool production, 1982. Pounds--1,635,000.
16th	Value of wool production, 1982--$785,000.
18th	All potato production, 1982. Cwt.--2,307,000.
23rd	Turkeys raised, 1982. Number--715,000.
23rd	Turkeys, pounds produced, 1982. Pounds--13,514,000.
24th	Value of all chickens on hand December 1, 1982. $8,303,000.
26th	Eggs produced, Dec. 1, 1981-Nov. 30, 1982. Number--809,000,000.
27th	All chickens, December 1, 1982. Number--4,050,000.
28th	Barley production, 1982. Bushels--1,175,000.

CROP REVIEW

by Rudy Wagner

Nebraska's 1982 production index for all crops was down 4% from the record high set in 1981. Total acreage harvested and the average yield index were both below a year earlier.

Total acreage harvested at 19.0 million was down 1% from 1981 and fractionally lower than 1980. The yield index declined 3% from the record high for 1981 but was 20% above 1980's heat and drought stricken crops. Although row crop yields were generally below a year earlier, record high yields were established for oats and barley and equaled for all hay. The only record high acreage harvested was for soybeans. New production records were established for soybeans, all hay and alfalfa hay.

Statewide, precipitation during calendar year 1982 was 24% above normal with the East Central District showing the greatest increase followed by the Northeast. The South Central showed the least increase followed by the Central District. Precipitation statewide was above normal in January, March, May, August and October through December and was lower in the remaining months. May precipitation was three inches above normal. Greatest decline from normal occurred in June.

Seeding of the 1982 wheat crop was completed ahead of normal. Moisture supplies were generally adequate for germination and fall growth, but were short in the Panhandle. Most of the crop entered the winter in good condition. Winter kill was light in spite of below normal temperatures and limited snow cover. Heavy spring precipitation, cool temperatures and high humidity produced a variety of fungi infections that lowered yields and reduced crop quality in the eastern half of the State. Cool weather during June also delayed maturity resulting in a harvest about ten days later than normal.

Cool, rainy weather for six straight weeks resulted in only 45% of the corn being planted by June 1 compared to 80% normal. This was the latest progress for this date since records began in the mid-forties and is well below the previous lows of 65% for 1951 and 1959. Much of the sorghum and soybean planting was also about two and one-half weeks behind normal. Improved weather conditions existed late in the planting season and most producers were able to plant crops as intended. Many late planted crops were not able to make up for lost growing time as a cooler than normal summer and fall reduced growing degree days. Moisture conditions were adequate during most of the summer which reduced irrigation needs and helped dryland crops. Hard freezing temperatures were not received until the third full week of October which allowed most of the corn and soybean crops to reach maturity. However, some sorghum grain did not reach full maturity before fall freezes were received. This resulted in lower dry matter accumulations and lighter than expected yields. Corn harvest got underway about three weeks later than normal and harvest progress continued behind normal as producers battled muddy fields, poor drying weather, and inadequate mechanical dryer space. Soybean and sorghum harvest also started late but finished near normal.

1982 CROP PRODUCTION HIGHLIGHTS & COMPARISONS WITH 1981

Corn for Grain	-- 770.3 million bushels	- down 3%
	6.94 million acres	- up 1%
	111 bushels per acre	- down 4 bushels
Soybeans	-- *82.8 million bushels	- up 5%
	*2.30 million acres	- up 11%
	36 bushels per acre	- down 2 bushels
Winter Wheat	-- 101.5 million bushels	- down 3%
	2.90 million acres	- unchanged
	35 bushels per acre	- down 1 bushel
Grain Sorghum	-- 121.9 million bushels	- down 26%
	1.67 million acres	- down 19%
	73 bushels per acre	- down 7 bushels
Dry Edible Beans	-- 3.18 million cwt.	- down 21%
	212,000 acres	- down 8%
	1,500 pounds per acre	- down 250 pounds
Sugar Beets	-- 926,000 tons	- down 51%
	45,400 acres	- down 42%
	20.4 tons per acre	- down 3.8 tons
All Hay	-- *7.81 million tons	- up 11%
	**3.8 million acres	- up 4%
	2.06 tons per acre	- up .14 tons per acre

*New record high. **Equals 1979 previous record high.

LIVESTOCK REVIEW

by Dennis Johnson

CATTLE

Nebraska farmers and ranchers had 7.2 million cattle and calves on hand January 1, 1983. This was a 1% decrease from the previous year following two consecutive years of increasing numbers. Cattle on feed for the slaughter market on January 1, 1983 numbered a record high 1.88 million head, up 15% from a year earlier and 4% above the previous record set in 1979. The number of beef cows that have calved were estimated at 2.03 million head, 6% below a year ago. Beef cow replacement heifers on hand January 1, 1983 totaled 290,000, down 11% from a year earlier. Calves born on Nebraska farms and ranches during 1982 totaled 1.93 million head, off 2% from 1981. The number of fed cattle marketed for slaughter from Nebraska's feedlots totaled 4.5 million head in 1982, up 11% from 1981. This marked the second straight year Nebraska was top ranked in the nation in fed cattle marketings.

The inventory of milk cows at the start of 1983 totaled 121,000 head, 1% below a year earlier. Milk production during 1982, at 1.36 billion pounds was 3% below the previous year's output. Average yearly milk production per cow totaled 11,057 pounds, the sixth consecutive year production surpassed 10,000 pounds per cow.

Although the all cattle numbers decreased only 1%, the total value of the inventory, at 2.7 billion dollars on January 1, 1983, fell 7% from the previous year. Average value per head dropped from $405 last year to $380 this year.

HOGS AND PIGS

Hog and pig inventory in Nebraska on December 1, 1982, numbered 3.5 million head, down 15% from the previous year. The total pig crop for 1982 was down 10% with 5.62 million pigs saved from 750,000 sows and gilts for an average of 7.49 pigs per litter. The December-May crop of 2.75 million pigs was saved from 370,000 sows. The June-November period showed 2.87 million pigs saved from 380,000 sows.

Total value of the December 1, 1982 inventory, at 330.8 million dollars, was up 8% from a year earlier. The decrease in inventory was more than offset by a sharp increase in value per head. Average value per head rose from $74.50 in 1981 to $94.50 in 1982.

SHEEP AND LAMBS

Sheep producers had an inventory of 205,000 sheep and lambs on hand January 1, 1983, 9% below a year earlier. The inventory consisted of 120,000 stock sheep and 85,000 sheep on feed, down 14% and unchanged, respectively. The 1982 lamb crop, which consists of lambs born from October 1, 1981 through September 30, 1982, was 125,000, down 13% from the 1981 crop. Wool production during 1982 totaled 1.64 million pounds, 5% less than a year earlier. Total value of wool produced in Nebraska during 1982 fell to 785,000 dollars, 39% below 1981. The average price per pound of wool declined from 74 cents during 1981 to 48 cents in 1982.

Average inventory value per head of $53.00 was down $1.50 from last year. Total inventory value of 10.9 million dollars on January 1, 1983 was 11% below a year earlier.

Poultry

Chickens in commercial and farm flocks as of December 1, 1982 numbered 4.05 million, down 2% from the previous year. An average of 3.5 million layers during the year produced 809 million eggs for the year ended December 1, 1982, compared to 802 million for the previous year.

Total value of the chicken inventory at 8.3 million dollars increased 3% from last year. Average value per bird moved up a dime from a year ago to $2.05.

Turkeys raised in Nebraska during 1982 totaled 715,000, up 5% from 1981.

PRICE REVIEW

by Dan Capstick

The Nebraska Index of Prices Received by Farmers for 1982 averaged 145 (1977=100), 3% below 1981 and 1% below 1980. The index for January was 139, climbed to its peak at 157 in May, then dropped to a yearly low of 137 for October and November. A new record high yearly average price was received for hogs and a new record high monthly price was established in September.

The 1982 Livestock and Livestock Products Price Index averaged 156, up 4% from 1981 and 3% above 1980. This ties the record high index recorded in 1979. The index began the year with a low of 142, climbed to 170 in May, then finished the year at 147 for both November and December.

Average monthly cash prices received for steers and heifers were highest in May at $70.00 per cwt. and lowest in December at $57.70 per cwt. The annual average was $62.90 per cwt., $0.30 below 1981 and $3.80 below 1980. The yearly average price for cows (excluding dairy herd replacements) was $38.70 per cwt., $2.80 lower than 1981 and $7.10 below 1980. Monthly average cow prices ranged from a high of $41.70 per cwt. in May to a low of $34.30 per cwt. in December. Calf prices averaged $63.50 per cwt., $4.30 below the 1981 average and $15.20 lower than the 1980 average. The monthly average calf price was highest in May at $68.00 per cwt. while the lowest price was received in January at $59.30 per cwt.

Prices received for all hogs averaged $52.60 per cwt. for the marketing year ending November 30, 1982. This record high yearly average price was $8.90 above the 1981 price and $14.50 above 1980. Prices were lowest in the first month of the marketing year with the December 1981 price at $38.80 per cwt. September's average of $61.60 established a new record high monthly average price.

Lamb prices averaged $54.70 per cwt. for 1982, $0.20 above 1981 but $9.60 below 1980. The high for the year was in May at $68.80 per cwt. while the low was in November at $46.40 per cwt.

All milk sold to plants during 1982 averaged $13.30 per cwt., $0.10 below last year's record high yearly average. January's average price was the highest for the year averaging $13.80 per cwt., while the lowest prices were received in July and August at $12.80 per cwt.

Nebraska's All Crops Index averaged 128 (1977=100), 15% below the record set in 1981 and 8% below 1980. Average monthly indexes were higher during the first half of the year with the highest in January, May and June at 136, while the low for the year was in October at 114.

Nebraska's wheat price began the year with a January average of $3.68 per bushel, hit the high for the year in March at $3.69 per bushel, reached its lowest point in August at $3.21 per bushel, and ended the year with a December average of $3.39 per bushel. June's average corn price was highest with $2.62 per bushel, while October's average was the low for the year at $2.14 per bushel. Oat prices went from the high average of $2.11 per bushel in February to the low average of $1.24 per bushel for November. Average prices for grain sorghum ranged from a high of $4.02 per cwt. in May to a low of $3.52 per cwt. in October. Soybeans average high price of $6.07 per bushel was recorded in May, while the lowest average price was $4.87 per bushel in October. All baled hay began the year at its highest average of $60.00 per ton for both January and February then reached its low of $42.00 per ton in November. Dry edible beans high average of $20.90 per cwt. was in January with the low average of $11.70 per cwt. being reached in December.

The United States Index of Prices Received by Farmers in 1982 averaged 133 (1977=100), 4% lower than the index for 1981 and 1% lower than 1980.

The United States Index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes and Wage Rates in 1982 averaged 156 (1977=100), 4% above 1981 and 13% above 1980.

The Ratio of Prices Received to Prices Paid for U.S. farmers for 1982 was 85. This compares to the 1981 ratio of 92 and the 1980 ratio of 97. The Index of Prices Paid by Farmers is unavailable at the State level, so a comparison between Prices Received and Paid cannot be made for Nebraska.

1/ Maintenance and bookkeeping combined with other agricultural workers. 2/ Insufficient data for this category. Data included in All Hired Farm Workers and in United States wage rates. 3/ Quarterly estimates discontinued. Annual surveys conducted beginning July 1982. 4/ January-April average.

FARM INCOME

by Scott Keller

Cash receipts from farm marketings in Nebraska are estimated to total a record 6.6 billion dollars in 1982, up 3% from last year's level and 2% above the previous record of 1980. The 1982 crops cash receipts establishes a new record high, while livestock was above the last two years.

Livestock receipts accounted for 56% of the State's 1982 total receipts and totaled 3.7 billion dollars, 5% above 1981 and 5% below the 1979 record. A new record high crop sales of 2.9 billion dollars showed a 1% increase over 1981, the previous record high.

The Index of Prices Received for All Farm Products was below the record high set last year. A much lower Crop Price Index more than offset a small increase in the Livestock Price Index.

Nationally, cash receipts from farm marketings were forecast to reach 143.0 billion dollars during 1982, down fractionally from the 1981 record. Receipts from livestock at 69.4 billion dollars were up 1% while crop receipts of 73.8 billion dollars declined 1%. Government payments, at 3.5 billion dollars, were nearly doubled from the 1.9 billion a year earlier.

State and National estimates of farm production expenses and net farm income were not available at this time.

GENERAL COMMENTS

by Bill Dobbs

Precipitation averaged 28.2 inches during 1982 in Nebraska, 18% and 4-1/2" inches above 1981. This was the fourth highest average in the last twenty years and fifth largest in forty years. Statewide, precipitation averaged 5-1/2 inches above the normal 22.7 inches. A very wet May delayed spring plantings but above normal moisture during August produced many excellent crop yields and large crop outputs. Precipitation was below normal during February, April, June, July and September and above in all other months.

Farm numbers in Nebraska totaled 63,000 during 1982, down 2,000 from 1981. Average farm size increased to 756 acres. New acreage being put under irrigation at 100,000 acres was only one-third of last year's 300,000-acre increase. Total acres with facilities for possible irrigation reached 7.6 million acres compared with 7.5 million in 1981 and 7.2 in 1980. There were 1,152 wells registered during 1982, down sharply from the 2,532 registered in 1981 and much lower than annual registrations of over 5,000 wells for the period 1975-1977.

Fertilizer sold in Nebraska from July 1, 1981 - June 30, 1982 totaled 1.8 million tons, down 11% from last year and 14% below two years ago record high 2.0 million tons annual consumption. Consumption of all principal fertilizer materials, except urea and secondary and trace nutrients were below last year. About 97% of the State's corn acres received some fertilizer, unchanged from a year earlier. The rate of fertilizer applied per acre on sample corn fields was sharply lower than a year ago for nitrogen (N), potash (K_2O), and phosphate (P_2O_5). About 56% of the wheat acreage was fertilized during 1981, down 8% from last year but nearly equal to 1979 and 1980. Rate of application per acre declined for N and P_2O_5, but increased for K_2O. Fertilizer was applied to 28% of the State's soybean acreage, above last year and equal to 1980. More N and P_2O_5 and less K_2O were applied than a year earlier. Estimates of other crops are not available.

Sales of retail commercial feeds in Nebraska totaled 1.8 million tons during the July 1, 1981 to June 30, 1982 period, up 1% from a year earlier.

Nebraska's share of the Nation's agricultural commodities exported during 1982 totaled $1.8 billion, down 14% from a year earlier. Feed grains and products accounted for 46% of the total compared with 56% last year.

1/ Places of 10 or more acres that had annual sales of agricultural products of $50 or more and places of less than 10 acres that had annual sales of $250 or more.
2/ Places with annual sales of agricultural products of $1,000 or more. Series starts 1975.

DISTRIBUTION & SOURCE OF NEBRASKA AGRICULTURAL STATISTICAL DATA

Reports on many commodities are available free to individuals and firms that may be asked to provide information on surveys made by the Nebraska Crop & Livestock Reporting Service. Others may receive the reports on a subscription basis. Timely summaries of all major reports are provided the news media, radio and TV stations, and educational establishments to serve Nebraska farmers, ranchers, and others with agri-business interests. The title of current reports covering Nebraska and national agricultural estimates, month of publication, and source of data used to obtain the estimates are shown in this table.

CURRENT REPORTS

Commodity	Publication month of report	Source of data for estimates
CROPS:		
Winter wheat seedings	December	Farm & ranch operators
Prospective spring plantings	February	Farm & ranch operators
Acreage forecasts	June	Farm & ranch operators
Yield & production forecasts	Monthly during growing season	Farm & ranch operators & field measurements 1/
Annual small grain summary	December	Farm & ranch operators
Annual row crop summary	January	Farm & ranch operators
Stocks of grain (farm & off-farm)	Jan., Apr., June, Sept. 2/, Oct.	Farm operators & mills & elevators
Weather - crop	3 P.M. Monday--April thru Nov. Monthly--December thru March	County Extension Agents, Lending Institutions & National Weather Service
Wheat varieties	February	Farm & ranch operators
Soybean varieties	February	Farm & ranch operators
Millet production & varieties	January	Farm & ranch operators
LIVESTOCK:		
Cattle inventory & calf crop	January	Farm & ranch operators
Sheep inventory	January	Farm & ranch operators
Hog inventory & pig crop	March, June, Sept., Dec.	Farm & ranch operators
Cattle on feed	Monthly	Farm & ranch operators
Commercial slaughter	Monthly	Livestock slaughter plants
Cold storage	Monthly	Commodity warehouses
Annual livestock production	April	Farm & ranch operators
POULTRY:		
Chicken inventory	February	Farm & ranch operators & hatcheries
Turkey inventory	January	Farm & ranch operators & hatcheries
Egg production	Monthly	Farm & ranch operators & commercial egg producers
Poultry production	April	Farm & ranch operators & hatcheries
MILK:		
Milk production	Monthly	Milk producers
Dairy products manufactured	June	Milk product manufacturers
PRICES & INCOME:		
Prices received by farmers	Monthly	Farm product buyers
Prices paid by farmers	Monthly	Merchants
Farm income	September	Farm & ranch operators
FARM EMPLOYMENT & FARM NUMBERS:		
Employment on farms & farm wage rates	August	Farm & ranch operators
Farm numbers	August	Farm & ranch operators

1/ Counts and measurements from small plots at monthly intervals prior to maturity. Harvested samples of mature grain and soybeans receive detailed laboratory analysis. 2/ Soybeans only.

REPORTS PROVIDING NEBRASKA COUNTY ESTIMATES

Report	Publication month of report	Source of data for estimates
Preliminary crop & livestock estimates past year	May	Farm operators, agri-business, USDA, & Nebraska Department of Agriculture
Commercial fertilizer sales	May	Neb. Dept. of Ag., Bureau of Plant Industry & fertilizer manufacturers
Derived feed grains fed by county (corn equivalents produced & fed to livestock)	July	Nebraska county crop & livestock estimates
Nebraska Agricultural Statistics (summary of all estimates & other selected data)	July	Farm & ranch operators, agri-business, USDA, & Neb. Dept. of Ag.

Reports available on request from: Nebraska Crop & Livestock Reporting Service, P.O. Box 81069, Lincoln, Nebraska 68501.

For more information contact: Jack L. Aschwege, Agricultural Statistician in Charge -- Phone: 402-471-5541.
